

WHAT YOU DO

Choose your method of collection... and RELAX!

WHAT WE DO

COLLECTION

Your selected method is implemented. We'll pick up, provide secure data destruction collection containers for your use, you can drop off at any of our recycling centers, or we'll help you host a community collection event.

PROCESSING

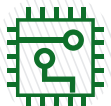

We log materials into our tracking system, and we execute your preferred data destruction service; independent auditing removes your liability and protects your interests.

SORTING & WEIGHING

Electronics are sorted by type, and we weigh each commodity; we always strive to recover maximum value from obsolete assets.

DISMANTLING

Our work continues as we separate materials for recovery and secure data destruction collection containers for your use, you can drop off at any of our recycling centers, or we'll help you host a community collection event.

RECYCLING

We sell materials* back into the supply chain; by avoiding landfill disposal, we're helping build new products and maintain a sustainable, energy-efficient process.

**(Not including hard drives that are destroyed per NIST/NAID standards.)*

CERTIFICATION

Certificates of destruction are available upon request; we contractually own liability, we're 100% backed by insurance, and we adhere to NAID requirements.

WHAT YOU DO

Receive certification.
GET PAID. SLEEP WELL.
